EDUCATION

Bachelors in Software Engineering

Oct 2024 – May 2028

Pak-Austria Fachhochschule – Institute of Applied Sciences & Technology, Haripur

Coursework: Data Structures & Algorithms, OOP, Database Systems, OS, Software Engineering, Discrete Structures, Linear Algebra, Calculus

WORK EXPERIENCE

Optimus Automate | Artificial Intelligence Intern

Jun 2026 – Present

- Contributing to AI-powered automation projects with hands-on experience in machine learning workflows, intelligent system design, and API integration.
- Applying Python and AI/ML concepts to real-world automation tasks, building practical understanding of production-grade AI application development.

Codiio Technologies | Front-End Developer Intern

Jul 2025 – Aug 2025

- Translated Figma/UI designs into responsive, pixel-accurate interfaces using HTML5, CSS3, and JavaScript; enforced cross-browser compatibility and mobile-first standards.
- Debugged UI issues alongside senior developers; practised clean code, Git version control, and agile team collaboration.

Self-Employed | Academic Tutor – Maths, Physics, CS, Chemistry & English (Part-Time, Grades 9–12) Aug 2021 – Present

- Delivered structured one-on-one instruction across five subjects; designed tailored lesson plans that measurably improved exam results and concept retention.

SKILLS

Languages and Frameworks: Python, JavaScript (ES6+), C++, SQL, HTML5, CSS3, Bootstrap 5, React.js, Node.js, Python Flask

Database & Tools: MySQL, MongoDB, Git, GitHub, VS Code, Ubuntu Linux

AI & Data: API Integration, Data Analysis, Gen AI, Prompt Engineering

Soft Skills: Problem-Solving, Communication, Mentoring, Collaboration, Professional Ethics

Certifications: Gen AI for Everyone · Essential SQL Skills for Data Beginners · Introduction to Artificial Intelligence

PERSONAL PROJECTS

SmartLearn — AI-Powered Study Platform *React · TypeScript · Node.js · Express · Gemini AI API* Full-stack student productivity platform unifying course management, AI note summarization, task tracking, quiz practice, and study analytics in a single workspace. Integrated Gemini AI to auto-generate practice quizzes from user notes and produce concise study summaries, enforcing active recall. Built RESTful API endpoints with Node.js/Express, SSO and email authentication, role-based user sessions, and a performance analytics dashboard tracking quiz accuracy, syllabus mastery, and weekly study trends. [link](#)

RideFleet Pro — Fleet Management & Ride Booking System *Python Flask · MySQL · HTML5 · CSS3 · JavaScript* Full-stack ride-hailing platform with 3 role-based portals (Admin, Driver, Customer), OTP verification, GPS-based automatic driver assignment, digital wallet with 5 payment methods, fare negotiation, ratings system, and an analytics dashboard. [link](#)

ChatbotIntentRecognition — AI-Powered Customer Support Chatbot *Python · Streamlit · Groq LLaMA API*

Interactive customer support chatbot that recognizes common user intents such as greetings, pricing inquiries, complaints, and support requests, delivering instant predefined responses for known queries. Integrated Groq's LLaMA model to generate intelligent, context-aware responses for unrecognized queries, implemented conversation history management to maintain context throughout each chat session, and built an interactive web-based interface using Streamlit for seamless real-time user interaction.
